AKTU B.Tech Theory Exam Paper Pattern

Latest verified pattern based on 2025–26 / 2026 B.Tech theory papers

Applies to: AKTU B.Tech theory examinations (common 70-mark external-paper format). Use this as the current working pattern for PYQ analysis and exam-paper generation.

Quick Summary: 3 Hours | Maximum Marks: 70 | Section A: 14 | Section B: 21 | Section C: 35

Section	Question Format	Questions Available	Attempt	Marks
A	Short / brief answers	7 parts	All 7	7 × 2 = 14
B	Descriptive / medium-long	5 questions	Any 3	3 × 7 = 21
C	Long-answer with internal choice	Q3–Q7	One part from each	5 × 7 = 35
TOTAL				**70**

1. Section A — 14 Marks

Pattern: Question 1 contains 7 short questions/parts. Each carries 2 marks. All 7 are compulsory.

Typical purpose: Definitions, formulas, short explanations, small numericals, concept checks, diagrams or direct applications.

Recommended answer length: Usually concise and focused; for a 2-mark answer, write the definition/formula plus the key point or a small example where appropriate.

2. Section B — 21 Marks

Pattern: Question 2 generally contains 5 descriptive questions, each worth 7 marks. Attempt any 3. Total = 21 marks.

Preparation focus: Prepare unit-wise descriptive questions because Section B is used to test explanation, derivation, application and medium-length problem solving.

3. Section C — 35 Marks

Pattern: Q3, Q4, Q5, Q6 and Q7 are 7-mark questions. Each question normally gives an internal choice (a/b), and the student attempts one part. Total attempted = 5 × 7 = 35.

Unit coverage: In the standard five-unit structure, Section C is designed to provide substantial coverage across the syllabus. However, actual paper-setting can vary by subject and examination session.

AKTU Paper Blueprint for Exam Preparation

A practical blueprint for your PYQ / Exam Generator project

Component	Expected Pattern	What to Learn
Q1	7 × 2 = 14	Definitions, concepts, formulas, short numericals
Q2	Any 3 of 5 × 7 = 21	Medium/descriptive questions; prepare multiple units
Q3	Any 1 of 2 × 7 = 7	Unit-based long answer
Q4	Any 1 of 2 × 7 = 7	Unit-based long answer
Q5	Any 1 of 2 × 7 = 7	Unit-based long answer
Q6	Any 1 of 2 × 7 = 7	Unit-based long answer
Q7	Any 1 of 2 × 7 = 7	Unit-based long answer

How to Use This Pattern for an Exam Generator

For your college exam-generator chatbot, a safe generation pipeline is:

Step 1 — Identify subject: subject code, semester, branch and syllabus version.

Step 2 — Split syllabus into 5 units: store topics under Unit I–V.

Step 3 — Analyse PYQs: detect repeated topics, question type, marks and unit.

Step 4 — Generate Section A: 7 short questions × 2 marks.

Step 5 — Generate Section B: 5 questions × 7 marks; student attempts any 3.

Step 6 — Generate Section C: Q3–Q7, each with two alternatives of 7 marks; student attempts one alternative in each.

Step 7 — Validate: final attempted total must equal 70 marks and the paper should respect the selected syllabus and unit coverage.

{"time": "3 Hours", "max_marks": 70, "section_a": {"questions": 7, "marks_each": 2, "attempt": 7}, "section_b": {"questions": 5, "marks_each": 7, "attempt": 3}, "section_c": {"questions": 5, "marks_each": 7, "internal_choice": true, "attempt": 5}}

Important Notes & Verification

1. This is a working latest-pattern reference, not a claim that every AKTU subject uses an identical layout. AKTU has different paper series, course structures and syllabus versions; the exact paper can vary by programme/subject.

2. Recent 2025–26 B.Tech Python paper: the available 2026 BCC302 paper shows 3 hours, 70 marks, Section A = 7 × 2 = 14, Section B = any 3 of 5 × 7 = 21, and Section C = Q3–Q7 with one alternative of 7 marks each, giving 35 marks. ■cite■turn2view0■

3. Recent 2026 Mathematics reference: an available 2026 BAS203 paper reference also reports a 70-mark, 3-hour theory paper with Section A = 14, Section B = 21 and Section C = 35. This supports the same overall 70-mark structure. ■cite■turn1search0■

4. Historical official AKTU communication: a Controller of Examination communication hosted by KIET lists an AKTU-provided “Format for 70 Marks QP_R Series_and_B Series” and instructions to paper setters, showing that AKTU has issued formal question-paper formats. ■cite■turn1search24■

5. Do not confuse external marks with total course marks. The theory paper is generally 70 external marks; internal assessment is handled separately according to the applicable course/scheme. Always check your current syllabus/ordinance for the subject.

Quick Revision Card

TIME	3 Hours
EXTERNAL THEORY	70 Marks
SECTION A	7 × 2 = 14 | Attempt all
SECTION B	5 × 7 available | Attempt any 3 = 21
SECTION C	Q3–Q7 | 2 alternatives each | Attempt 1 each = 35
TOTAL ATTEMPTED	14 + 21 + 35 = 70

Prepared as a student/project reference from current 2025–26/2026 paper evidence and available AKTU-related format documentation. Before using it as an authoritative university regulation, verify the latest subject-specific notification/syllabus from AKTU.
